Company Background

Lecintech

Dongguan Lecin Technology Co., Ltd. specializes in the field of pest control.

The company has mastered multiple core technologies for non-toxic pest control, achieving significant advantages in pest elimination effectiveness, stability, energy efficiency, and environmental protection. These capabilities meet diverse pest control needs across both residential and commercial settings for various users.

Lecin Technology employs advanced production equipment and a scientific management system, rigorously controlling every production detail. From raw material procurement to product assembly and final product inspection, we adhere to international quality management standards to ensure each product delivers outstanding performance and reliable quality.

Looking ahead, Lecin Technology will continue to uphold the principles of “Innovation, Quality, and Service,” continuously optimizing product performance to create safer and more comfortable living environments for users worldwide.
